

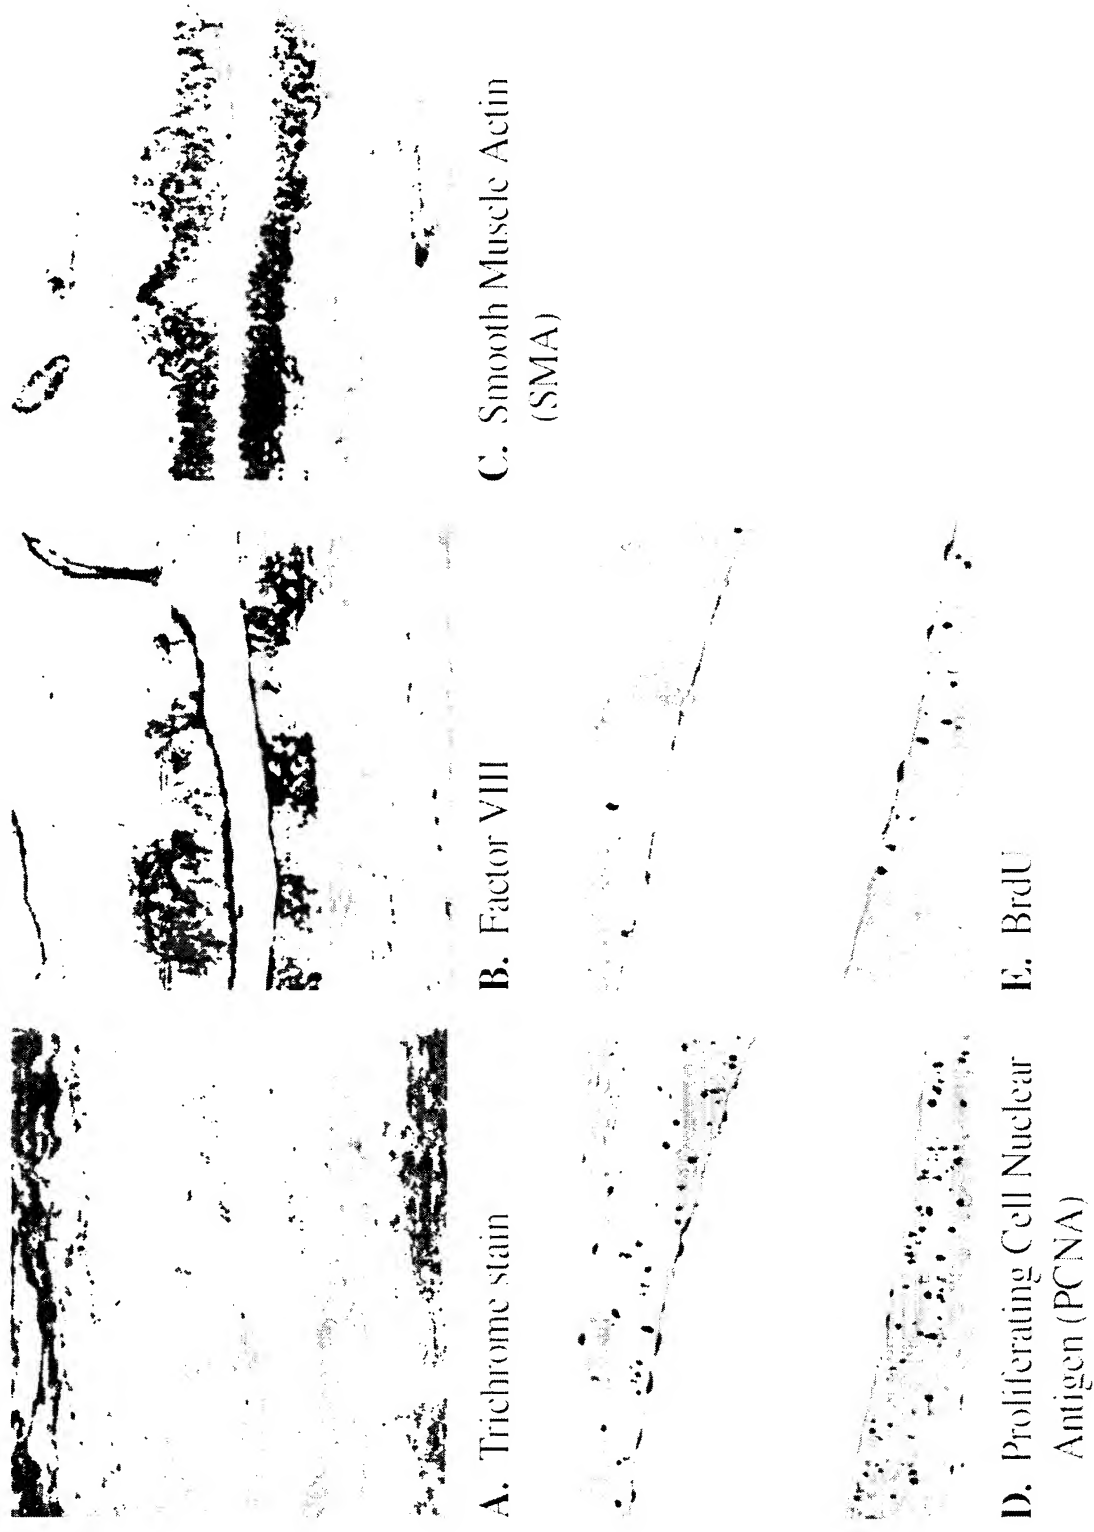

**FIG. 1a-e:** Histological sections of blood vessels formed in canine myocardium 2 weeks following injection of BDAP in 70% povidone

A. Trichrome stain

B. Factor VIII

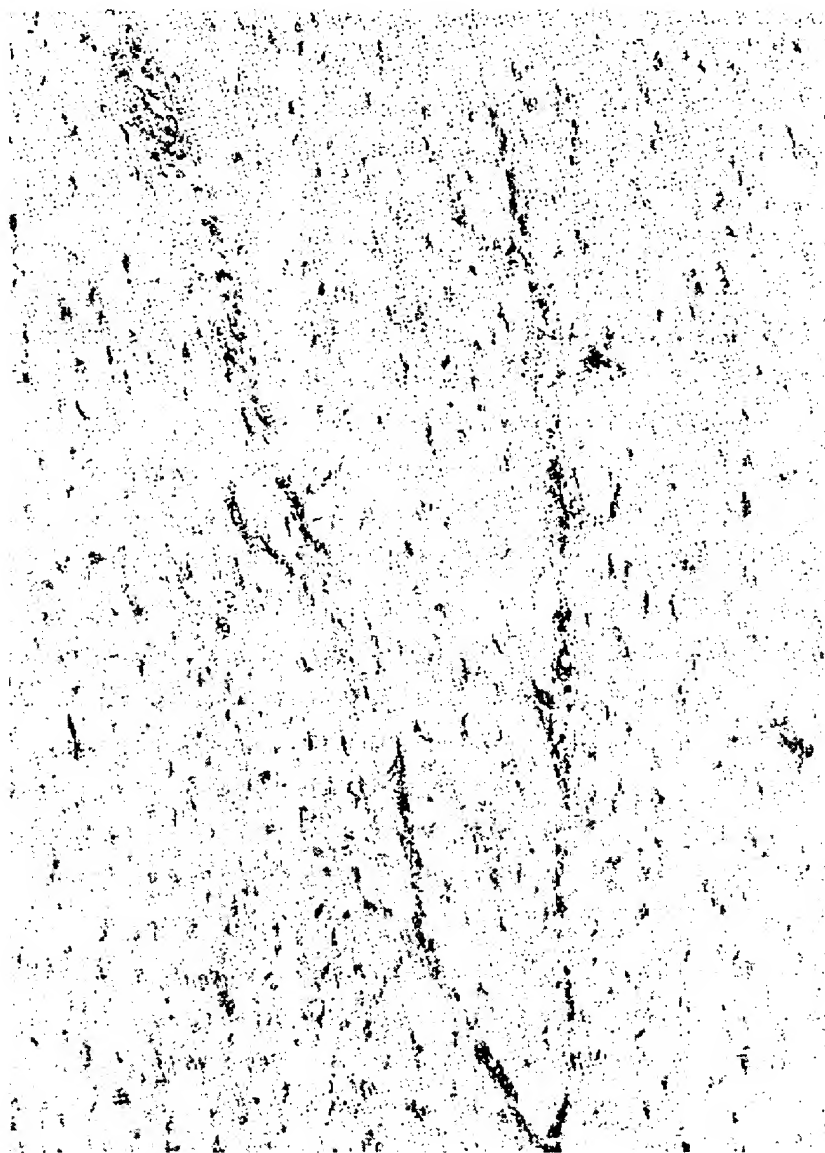

C. Smooth Muscle Actin (SMA)

D. Proliferating Cell Nuclear Antigen (PCNA)

E. BrdU

**FIG. 2:** 109-6-5M: Immunostaining of Smooth muscle cells and BrdU positive cells in sections of ischemic myocardium treated with GDF-5 solubilized in 1% povodone.

**FIG. 3:** TMR-GFM: Factor VIII immunostaining of a section of porcine myocardium that received GFM solubilized in 5% povidone.
